In order for teachers to improve their expertise, it is important that teachers put themselves into a practice-reflection-reconstruction cycle and that they reframe school as a learning community. Taking that into consideration, the University of Fukui implements a world-leading "school-based approach," and offers practical teacher education. Our objective is to be a graduate school where teachers work cooperatively with their colleagues to solve problems at school. Instructors at the University of Fukui and teachers at affiliated schools work together to tackle challenges at schools, reflect on the process, work on research reports, and deepen our collective understanding in roundtable conferences with other universities. There are instructors in various fields. Students can receive multi-disciplinary research instruction from team teaching in the program.
